

DRIVING STEEL PILES

(6-12-01)

~~The Contractor's attention is directed to Article 450-11 of the Standard Specifications and this provision.~~

After steel piles have been driven to specified bearing, the Contractor may drive the piles to grade in lieu of cutting off the piles provided the maximum blow count is not exceeded and the additional length of the pile to be driven does not exceed 5 feet.

450-11(B)

If the piles are driven to grade, the additional length of pile shall be paid for at the contract unit price per foot for "_____ Steel Piles". No additional compensation will be made for cutting off the piles.
